Summary

Software Engineer with 3+ years of experience, primarily focused on C# and Js development with a backend heavy specialization in .NET and React for front end, with a strong emphasis on writing clean, maintainable, and scalable code.

I have strong knowledge of software architecture and follow SOLID principles in day to day development. I work in an AI centric way, actively using modern AI tools to improve productivity, code quality, and problem solving across development tasks while continuously adapting to new technologies.

Experience

Techstract | Software Engineer | Jan 2024 - Present

- Built and maintained backend services in .NET and developed interactive experiences using React and Phaser.js for web based applications.

Terafort Ltd | Software Engineer | Jan 2023 - Jan 2024

- Specialized in game development in C# using Unity 3D, crafting player friendly experiences with engaging game elements that maximized player retention.

Education

Software Engineering | Lahore Garrison University | 2017 - 2022

Intermediate in Computer Science | Govt. College Gulberg, Lahore|2015 - 2017

Certifications

- **Build web apps with ASP.NET Core for beginners** | Microsoft
- **Create a web API with ASP.NET Core controllers** | Microsoft
- **Introduction to Programming Using C#** | SoloLearn
- **Introduction to Programming Using Python** | Kaggle
- **Intro to Machine Learning** | Kaggle
- **Intro to HTML** | SoloLearn
- **Intro to CSS** | SoloLearn

Skills

- **Programming Languages**
C#, JavaScript
- **Backend Development**
.NET, .NET Core, ASP.NET MVC, ASP.NET, Web API, RESTful APIs, EF Core, SignalR, JWT Authentication, Lambda Functions, Code First Migrations
- **Frontend Development**
React, HTML, CSS, Three.js, Tailwind CSS
- **Databases**
SQL Server, Azure SQL Database, MongoDB, PostgreSQL, Database Design, Query Optimization
- **Architecture & Practices**
Clean Architecture, SOLID Principles, Microservices Architecture, Repository Pattern, Agile Methodology, System Design Basics, Debugging & Bug Fixing
- **Tools & Platforms**
GitHub, Visual Studio, Visual Studio Code, Postman, Jira, ClickUp, Trello
- **AI Tools**
Claude Code, GitHub Copilot, ChatGPT, AI assisted development, workflow automation

Personal Projects

- **3D FrontEnd - React + Three.js Project**
<https://github.com/Zubair404/ThreeJs-Learning>

Developed a frontend application using React 19 and Vite, integrating Three.js for 3D rendering, React Leaflet for interactive maps, EmailJS for contact forms, and StyledComponents for styling.

- **Text Summarizer - MERN , OpenAI API**

<https://github.com/Zubair404/MernGptSaas>

Built a MERN-based SaaS application using React, Node.js, Express, and MongoDB with JWT authentication. Integrated OpenAI GPT API to generate text summaries from user input, implementing secure API usage and micro SaaS functionality for AI-powered content processing.

- **Simple CRUD App - Asp .Net**

<https://github.com/Zubair404/Asp-.Net-Basic-Crud>

Developed a CRUD application using ASP.NET Core and C#, with Entity Framework Core and Microsoft SQL Server for data management. Implemented Create, Read, Update and Delete operations with Razor Pages/MVC views, focusing on database connectivity, data handling and structured backend development.

- **JWT Authentication & Authorization System**

<https://github.com/Zubair404/JwtAuthDotNet>

Implemented authentication and authorization using ASP.NET Core Identity, Entity Framework Core, and JWT. Developed secure login and role-based access control, with API documentation using Swagger for endpoint testing and validation.
